VACUUM FILLING MACHINE V2

EXT Vacuum filling machine has now been upgraded in an even better version. Thanks to the experience developed in production and feedback of the V1 version, plus to the big know how on the production of shock absorbers.

AVAILABLE VERSIONS

● 1 RESERVOIR

● ● 2 RESERVOIRS

● ● ● ● 4 RESERVOIRS

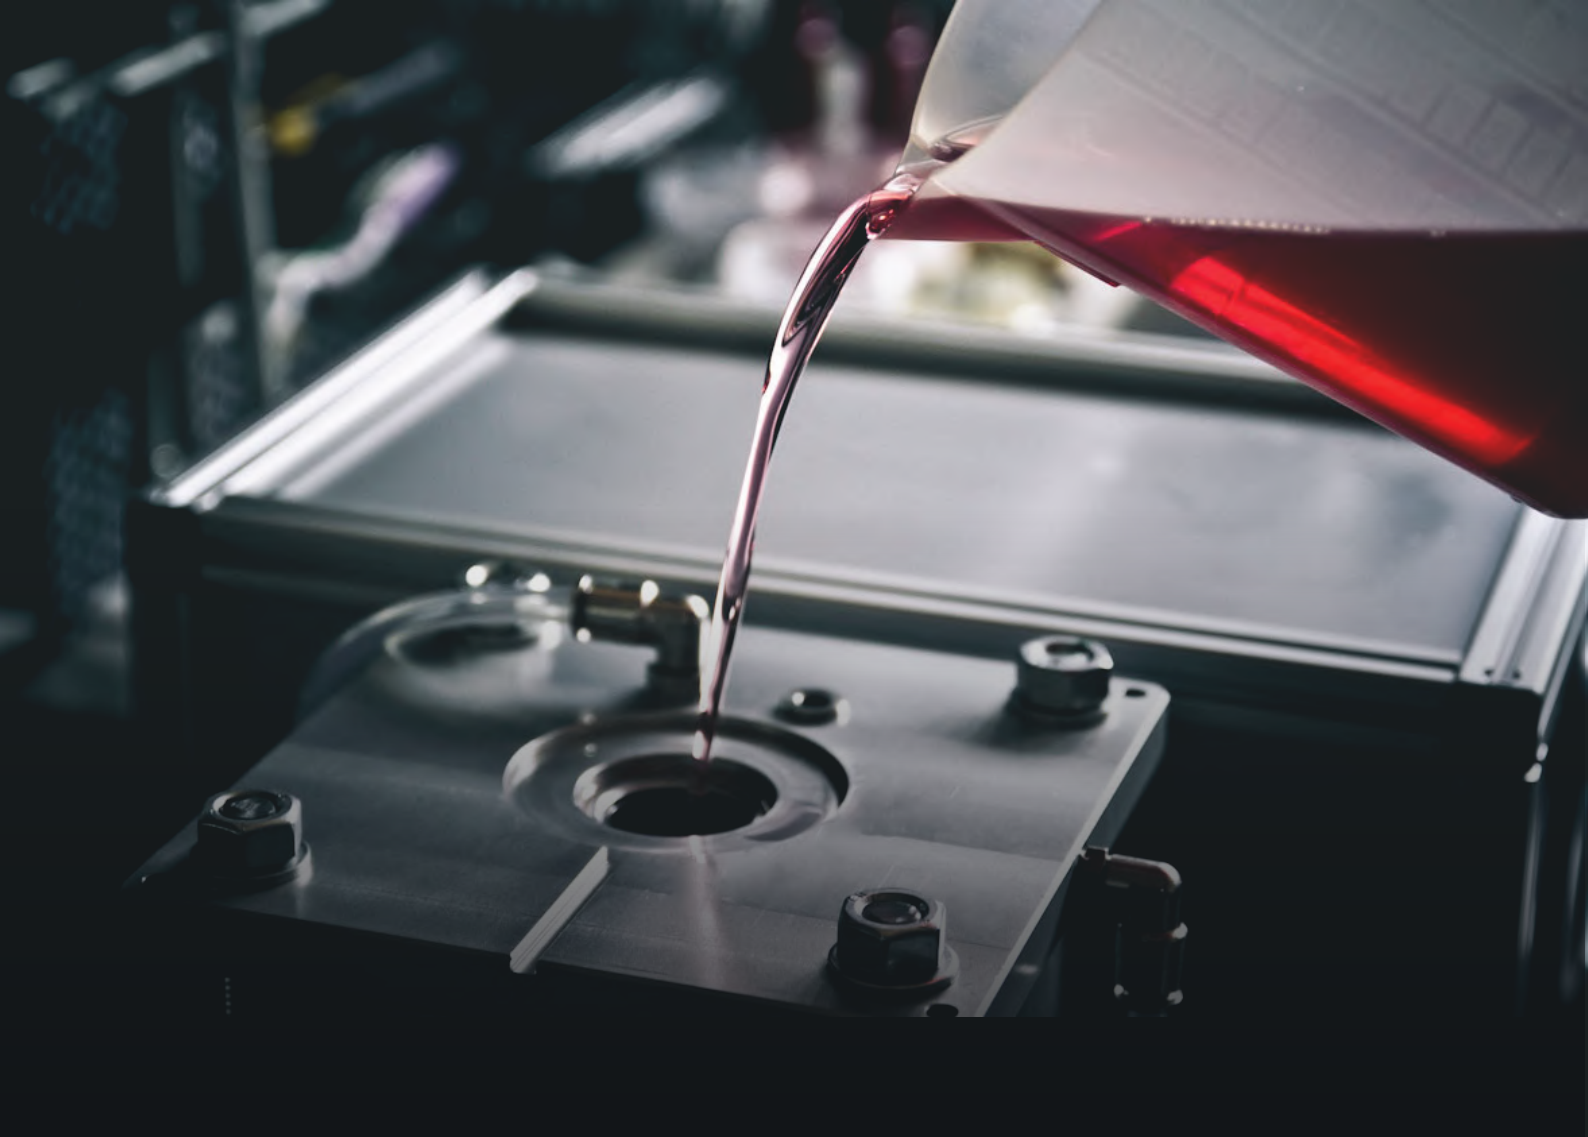

AVAILABLE VERSIONS

Vacuum filling machine V2 is now more efficient, reliable, safety and easy to use package that include:

- 2.5l / 5l version for different damper sizes (1 oil flow)
- 0.6l x 4 version: 4 small tank to store simultaneously different oils (4 different oil flows)
- Open-design frame to optimize cleaning operation
- High precision Busch vacuum gauge 0-25mbar
- High end Busch pump capable of 2mbar of final absolute pressure
- Possibility to upgrade/swipe between 2,5l / 5l / 4 tanks version
- Suitable for all types of shock absorber
- Increased vacuuming quality and operation time: direct connection between pump and tank
- Improved usability:
 - . Two-position lever + on/off button, for faster and easier operations
 - . Frontal pressure adjustment
 - . Improved safety: emergency button now also cut the air pressure from the connection
 - . Simplified pneumatic - electric circuit: reliability and easy maintenance
